**2002-2005** A-Levels, Southlands Community Comprehensive School  
**2005-2008** BA (hons) Visual Design & Advertising, University of Kent

## Experience

### **2008 to date Lead Web Engineer, Liquid Computing Ltd**

In this job I am employed as an all round Web Engineer and Graphic Designer. This includes obtaining a brief from clients and working closely with them to design and build their ideal website. I am also a Web Technician so any issues regarding Email, Servers or Web hosting fall to me. I am in charge of a small team of developers to ensure the smooth running of the business.

### **2007-2008 Designer, Stone Print & Design**

In this job I was employed as an all round designer, designing websites, brochures, stationary, logos, literature and much more. Working in a small team of designers I learnt to work to deadlines and communicate with clients.

### **2005-2008 Sales Assistant, Wyevale Stores PLC**

In this job I had a lot of variation in the work I was doing; when I first started I was mainly based on the tills which was very customer orientated and I learnt how to handle money quickly and efficiently. This job also helped me develop my tele-communication skills and I learnt the sales side of the company which helped develop my sales technique.

## **2002-2004 IT Technician, Southlands Community Comprehensive School**

In this job I had a lot of responsibility and was entrusted with restricted information such as the administrative password for all school computers. I was called upon to do a wide range of jobs from typing, answering problem calls and database logging. My main duties included fixing software, networking, building and repairing PCs. I had this job while I was studying and it help increase my communication skills and computing ability greatly.

## **Skills**

I am proficient with many different programs and software, such as Photoshop, Illustrator, Flash, Dreamweaver, Quark, Word, PowerPoint and FTP software, along with most mail software such as Outlook.

I am adept in most coding formats, including HTML5, PHP, SQL, CSS3, JavaScript and jquery among others. I have also built sites using various different CMS platforms including CMS Made Simple, Silverstripe and Wordpress.

## **Interests**

In my spare time I play guitar and sing in a band, we perform at many local venues, and I just love music. I play basketball for my local team and I also play tennis and squash, I enjoy many sports and have many medals and injuries to show for it. In the past I have been part of a wide range of activities; I was part of a team that raised £50,000 towards a skate park for my local town, this included talking to different companies for sponsorship and organising different fundraising activities.

I also took part in an engineering course in which my team won the gold crest award for innovative design, this taught me the importance of working as part of a team. At university I took part in many exhibitions and have shown my work in a gallery space. I really enjoy designing spaces and building exhibitions. For many of these exhibitions I was assigned Lead Curator and Set Designer, I like designing work that everyone can enjoy, and that's what my spaces tend to be about, getting everyone involved.

More recently I have become an avid photographer and enjoy capturing images of wildlife as well as people, I love capturing a natural image as I believe it shows the true personality of the subject.
